

## Bella's Bingo Guide

Welcome to **Bella's Bingo Guide!**

Now, let us make sure you have a great kick start on your bingo!

Under "What is bingo?" you can read more about the general set-up of the bingo game. But let us first start from the beginning.

First you need to register yourself. Enter your email, name, and other info requested.

You also get to pick a nickname you like and will remember. Keep it friendly and fun. No cursing, or bad words which might offend someone. We all want to have a good time together, right? Why not add a number or more to spice it up a bit? Once you registered you can have a click around to get to know Bella Bingo.

To be able to bingo you first you need to fill up your balance.

Your balance is what you use to purchase your bingo tickets.

Click on "Wallet". Choose your preferred way of payment option and follow the steps.

**Now you are ready to let the bingo fun begin!**

Click on the "Bingo"-tab and chose your bingo room.

Maybe you want to choose a room with a **Chat Moderator (CM)** in? They always make the bingo so much more fun with chat games which we will explain further down. Under "Chat Moderators" you can see which CM's who are online and in which room.

Also, the specific rooms will show if there is a CM. You'll fast realize that bingo is so much more than just a ticket and numbers to be drawn. There will be everything from chat games to fun discussions in the rooms. Take your time to get to know our CM's. They'll love to get to know you too!

Time to get back to the actual bingo!

To play you select the ticket or tickets you wish to play. Mark them with a click and then click the "Buy" button. The price of each and every ticket can be found in the upper left corner. You can also scroll to the right to see even more tickets for display.

Once you chosen your ticket, take a comfortable seat and wait for the exciting game to kick off.

If a drawn number is matched with a number on your ticket(s), it will then be marked. Mark your numbers yourself or let the game mark them for you. But hey, don't worry if you don't manage to mark them all. If you have a winning bingo ticket, you'll be awarded! All tickets are corrected in the game to not miss out on any glimmer and gold.

After every bingo game, you'll see your balance go up with any winnings.

**So how do I get that bingo?**

The person to get a bingo is the one who first get a line either horizontal or straight down within a block in a round. The bingo game has several rounds, which means more chances to win!

But why let the fun stop here? Nope, did not think so! Additional to this you may get bingo several times during the game with different types of patterns such as 2 rows, a cross or a full block. You can get bingo until the last number is drawn!

## **CM's & Chat Games**

We mentioned above a little about the chat games done by the Chat Moderators (CM's).

To make bingo even more fun you can also participate in these side games.

All you need to do is to have bought at least 1 bingo ticket in the particular round and then follow the instructions by the CM. The CM will tell you when it's time for a new chat game. You post your reply to the CM Chat Game in the bingo chat before the numbers are starting to be drawn. When your numbers of the chat game have been drawn you re-post your numbers again in the chat together with the name of the particular chat game. If you win your chat game, the CM will credit your bingo account with the winnings. Don't worry, it's way easier than you think!

Feel free to ask the CM if you feel a bit unsure of the rules.
